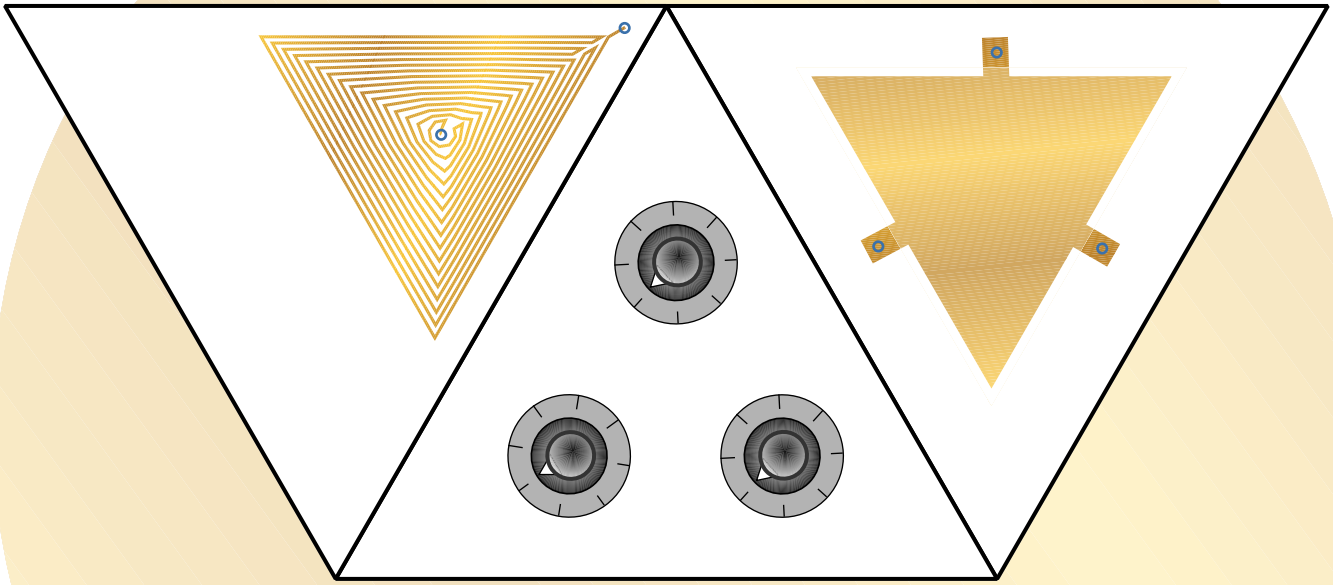
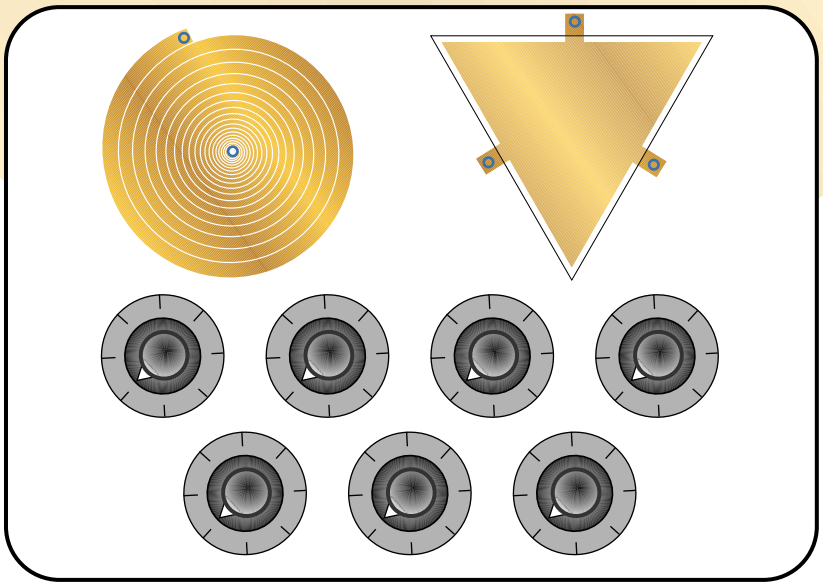
How to build a



Radionics Device



That works by
Mind Power

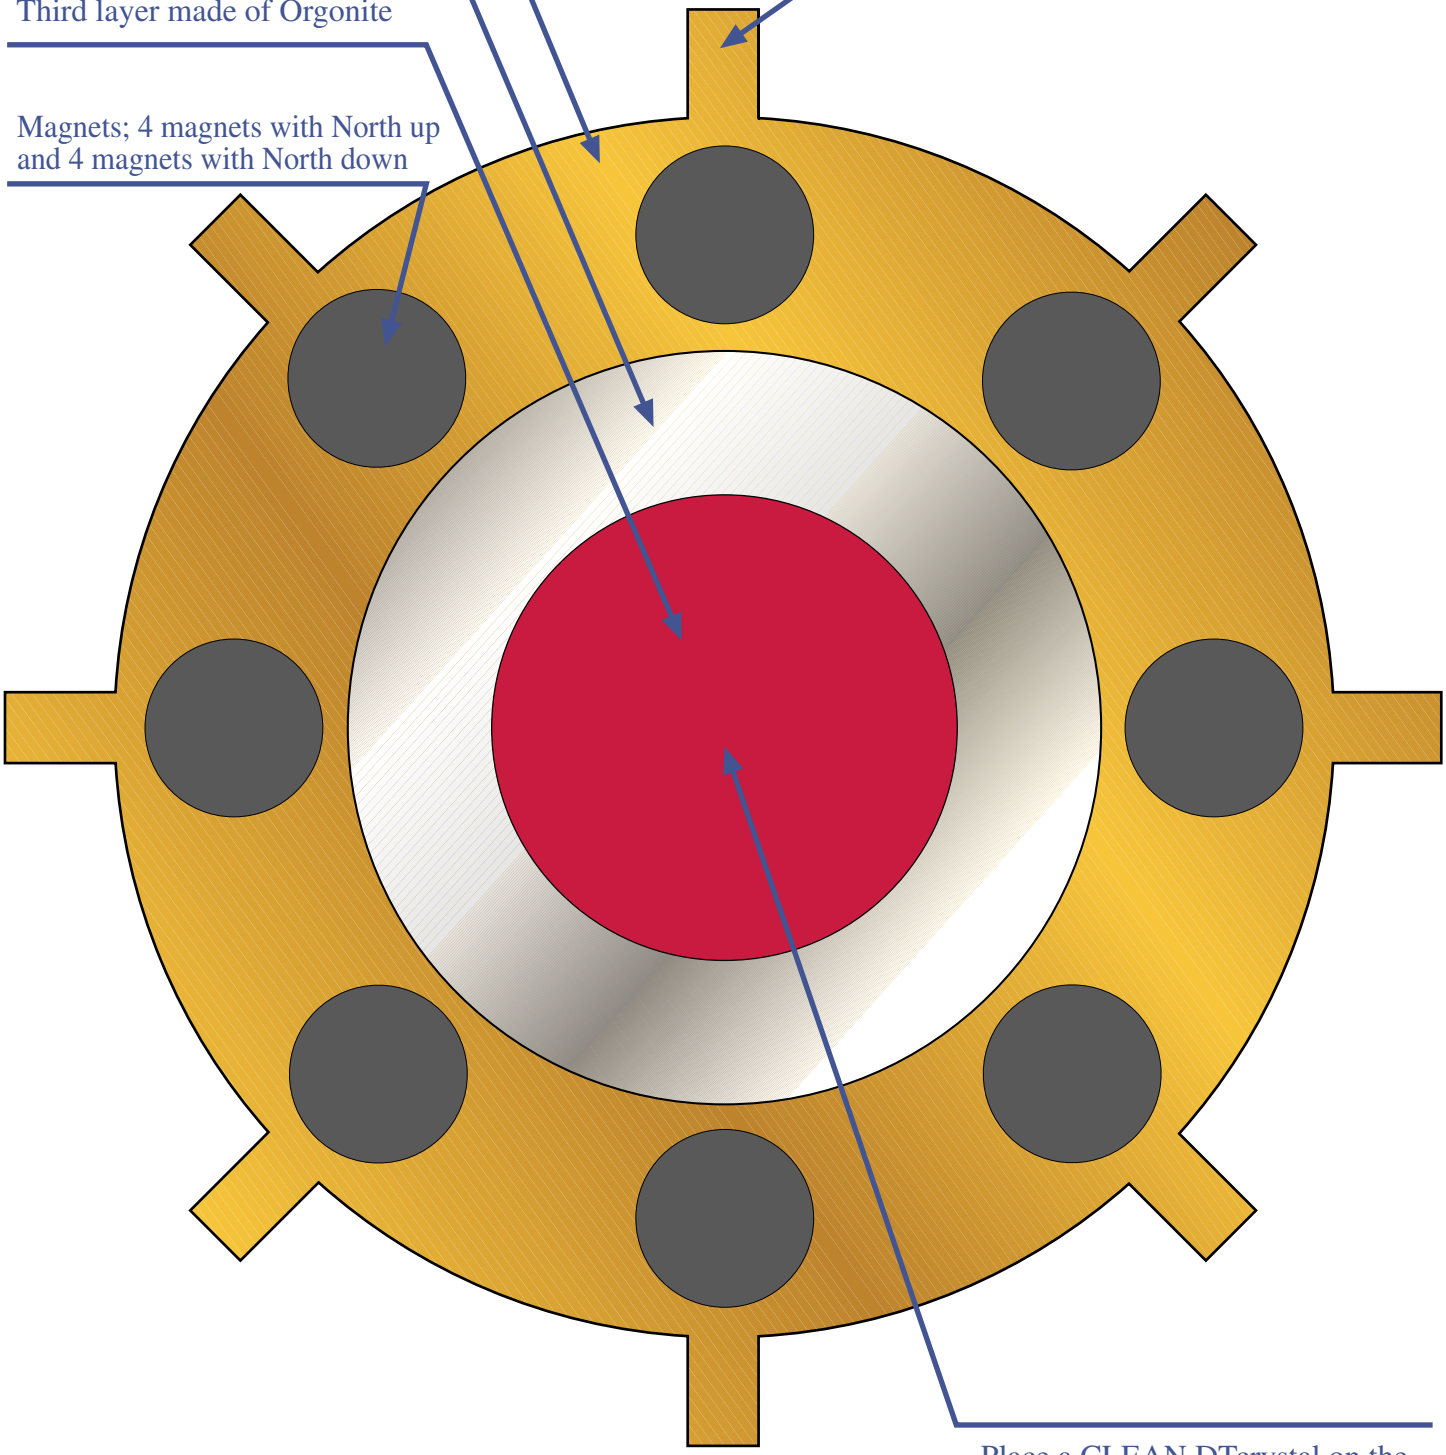
First layer made of copperfoil

second layer: mirror
(try to get the best quality)

Third layer made of Orgonite

Magnets; 4 magnets with North up
and 4 magnets with North down

Connectors; use two to connect
to the dials, two to connect
to an antenna (or witness coil),
two to connect to the rubbing plate
and two to connect to the headband.



Place a CLEAN DTcrystal on the
third (orgon) layer, use tape to
connect, but NEVER use glue!!

Radionic Heart

this is the heart of the device,

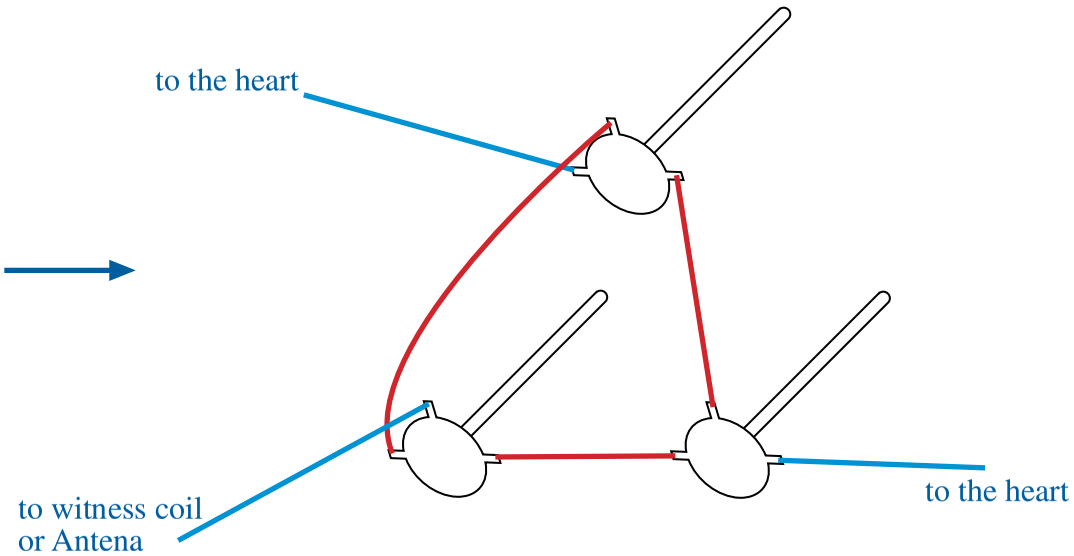
How to connect the dials

if you use 3 dials
(don't use less!!)



The dials are potentiometers:
10KW, Wattage 1/2W,. Tolerance 20%,
6mm shaft.for knob, Mount in a 5/16"-diameter hole.
